

Mercury Insurance: A Company You Can Trust

Let's be honest, who doesn't want to save money on their insurance?

Finding the best deal on insurance is priority number one for many consumers, but cost isn't the only thing you should consider when you choose an insurance company. It's also very important to look at a company's financial stability, because you need to know your insurance company will be there when you need it and that it has the resources to pay your claim quickly.

Look no further than Mercury Insurance, which has once again been named to Forbes' annual list of America's Most Trustworthy

Financial Companies. This list highlights companies that are financially sound and trustworthy ... and Mercury Insurance is included for a seventh time.

"We are honored that Mercury has once again been named by Forbes as one of America's most trustworthy financial companies," said Mercury CEO and President, Gabriel Tirador.

"We offer a terrific combination of low rates and excellent service, which has helped us earn the trust of millions of customers."

Mercury has been protecting its customers, their families and their property ever since opening its doors in 1962. It's a responsibility the company takes seriously and they are

committed to providing the best possible service and protection to every customer.

This commitment also extends to Mercury's thousands of local, independent agents. These professionals provide expert guidance and advice to help customers craft insurance plans

specific to their needs ... and they'll even give parents tips to help teach young drivers how to be responsible behind the wheel.
